

Project Rescue: Different Techniques for Project Recovery

sponsored by B-W Professional Development and the NEOPMI

Any project at any organization with any team can fail...

September 23, 2010
8:00 a.m. - 11:30 a.m.

Agenda:

8:00 - 8:30 **registration, breakfast**

8:30 - 11:30 **program**

Projects never go from being well managed, on-budget and on-schedule to outright failure overnight. There is always a transition period during which time the project is “troubled”. It is during this time that a window of opportunity exists in which the project can potentially be rescued, and is likely the last chance to save the project.

As project professionals, we have often tried all the tricks and tips to bring a troubled project back on track. However, as project complexity increases, so do the root causes of the trouble and often a “back to basics” rescue approach needs to be initiated. Together we will discuss the Rescue My Project™ Methodology and its similarities and differences with other methods that are being used.
